CZR TOKEN WHITEPAPER

THE UTILITY TOKEN FOR A GLOBAL DIGITAL ASSET ECOSYSTEM

TOKEN OVERVIEW

ATTRIBUTE	INFORMATION
Token Name	CZR
Token Symbol	CZR
Issuer	CZR Fndn Ltd.
Issuer Jurisdiction	British Virgin Islands
Network	Ethereum
Token Standard	ERC-20
Contract Address	0xfeD863B6A995BE69c2BBc5089BcDa5414793CE24
Maximum Supply	1,000,000,000 CZR
Current Total Supply	1,000,000,000 CZR as of September 18, 2026
Reference Launch Price	$0.025
Reference Fully Diluted Valuation	$25,000,000
Planned Launch Date	October 1, 2026
Initial Trading Venue	CZR Exchange
Initial Trading Pair	CZR/USDT
Issuer Website	https://czrtoken.com
Administrative Contact	admin@czrtoken.com
User Support	support@czrtoken.com

IMPORTANT LEGAL AND RISK DISCLAIMER

- This Whitepaper is provided for general informational purposes regarding the CZR ecosystem and the intended functionality of the CZR token
- This document is not a prospectus, offering memorandum, investment recommendation, financial promotion, or solicitation to purchase or sell any security, commodity, financial instrument, or regulated product.
- CZR is designed as a utility token. Its availability, legal classification, permitted functionality, and distribution may differ by jurisdiction
- Nothing in this Whitepaper guarantees that any feature, trading venue, integration, product, timeline, reward, discount, governance mechanism, or other utility will be available in every market or at any particular time.

DIGITAL ASSETS INVOLVE SUBSTANTIAL RISKS, INCLUDING:

- Price volatility
- Smart-contract vulnerabilities
- Cybersecurity incidents
- Liquidity limitations
- Counterparty failures
- Technology disruptions
- Regulatory changes
- Tax consequences
- Loss or compromise of private keys
- Possible loss of all value

- CZR may lose some or all of its value. CZR may not always be transferable or liquid. Any utility, product, reward, or service described in this Whitepaper may be delayed, modified, restricted, suspended, or discontinued.
- No statement in this Whitepaper constitutes a promise of profit, price appreciation, yield, liquidity, or investment return.
- The reference launch price of $0.025 is not a guarantee of execution price, future market price, liquidity, demand, market capitalization, or token value.
- Forward-looking statements reflect current plans, expectations, and assumptions. These statements may change without notice. Development and deployment remain subject to technical, commercial, compliance, governance, security, and market considerations.
- Access to CZR products and services may require identity verification and may be restricted based on location, residency, citizenship, eligibility, sanctions status, or applicable law.
- CZR Fndn Ltd. may revise this Whitepaper, token functionality, distribution procedures, roadmap, or implementation plans when reasonably required. Any material revision remains subject to applicable law and the smart contract's immutable maximum-supply cap.
- Users should conduct independent research and obtain appropriate legal, tax, financial, and technical advice before acquiring, holding, trading, transferring, or using CZR.

LEGAL AND REGULATORY POSITION

- No court, regulator, governmental authority, or other public body has approved or endorsed this Whitepaper, CZR, its economic structure, or any statement contained in this document.
- Applicable laws, regulations, and regulatory interpretations may change. The legal classification, availability, and permitted use of CZR may differ between jurisdictions.
- Each person is responsible for determining whether acquiring, holding, transferring, or using CZR is lawful in that person's jurisdiction and circumstances.

DOCUMENT PRECEDENCE

- This Whitepaper is informational and does not constitute a contract or legally binding offer.
- CZR may be distributed or used subject to separate binding terms, eligibility requirements, platform rules, vesting agreements, or other contractual documents.
- If an inconsistency exists between this Whitepaper and binding terms applicable to a particular distribution, service, or transaction, those binding terms will prevail for that matter.
- Marketing materials, presentations, interviews, social-media posts, and the CZR Litepaper are secondary informational materials. They do not amend or replace this Whitepaper or applicable binding terms.

MANAGEMENT RESPONSIBILITY STATEMENT

The management body of CZR Fndn Ltd. has reviewed this Whitepaper.

TO THE BEST OF ITS KNOWLEDGE, THE MANAGEMENT BODY CONFIRMS THAT:

- The information presented is fair, clear, and not intentionally misleading.
- This Whitepaper does not intentionally omit information reasonably likely to affect its meaning.
- The token-allocation figures total **1,000,000,000 CZR.**
- The allocation percentages total **100%.**
- Smart-contract disclosures are based on verified contract source code, observable on-chain information, and the final CertiK report.
- Material risks associated with CZR have been presented in good faith.
- Forward-looking statements are identified as plans, expectations, or objectives rather than guarantees.
- No statement guarantees token value, liquidity, profitability, rewards, or investment returns.

This confirmation is based on information reasonably available as of the publication date.

ISSUANCE

ISSUED BY: CZR Fndn Ltd.

WHITEPAPER VERSION: 1.0

STATUS: Final Public Version

FINALIZATION DATE: September 20, 2026

PUBLICATION DATE: September 25, 2026

TABLE OF CONTENTS

TABLE OF CONTENTS

EXECUTIVE SUMMARY

ONE TOKEN. ONE CONNECTED ECOSYSTEM.

CZR is the native utility token designed to connect trading, self-custody, payments, rewards, access, and community participation across the CZR digital-asset ecosystem.

- CZR Exchange
- CZR Wallet
- Spot and futures trading
- Automated and copy trading
- Swap and bridge functionality
- Rewards and loyalty programs
- Payment and card products
- Launchpad access
- Partner integrations
- Institutional and brokerage services
- Future decentralized services

- CZR is intended to serve as the shared utility layer connecting these products and services.
- CZR Exchange is intended to serve as the initial and primary trading venue for CZR, creating a direct connection between token trading, platform participation, CZR Wallet, rewards, memberships, and future ecosystem utility.
- CZR has an immutable maximum-supply cap of 1,000,000,000 tokens. The full maximum supply has been minted. The contract prevents total supply from exceeding one billion CZR.
- Tokens may be burned. While an authorized minter remains active, minting may restore burned supply up to—but never above—the one-billion-token maximum cap.

CZR'S INTENDED UTILITIES INCLUDE:

- Trading-fee benefits
- CZR Earn and ecosystem rewards
- VIP and membership access
- CZR Wallet integration
- Launchpad participation
- CZR Card rewards and rebates
- Referral and loyalty rewards
- Community participation
- Partner benefits
- Approved treasury and token-supply programs

CORE DESIGN PRINCIPLES

Maximum Supply Cap: The contract prevents total supply from exceeding 1,000,000,000 CZR.

Utility First: CZR functionality is designed around products, access, rewards, benefits, and ecosystem participation.

CZR Exchange First: CZR Exchange is intended to remain the primary market, principal trading experience, and central source of ecosystem utility for CZR.

Transparent Allocation: The entire maximum supply is assigned across disclosed allocation categories totaling 100%.

Controlled Distribution: Token releases, campaigns, rewards, liquidity programs, and treasury deployments are intended to operate under documented authorization and security controls.

Sustainable Economics: Rewards should be supported by allocated supply, approved program budgets, eligible ecosystem revenues, or transparently acquired CZR.

Global Compliance: Token functionality and availability may be adjusted according to legal restrictions, sanctions controls, licensing requirements, and regulatory developments.

ISSUER AND ECOSYSTEM STRUCTURE

TOKEN ISSUER

THE ISSUER OF CZR IS:

CZR Fndn Ltd.

CZR Fndn Ltd. is incorporated in the British Virgin Islands and is responsible for the issuance, administration, and development of CZR and associated ecosystem programs.

OFFICIAL WEBSITE: https://czrtoken.com

ADMINISTRATIVE CONTACT: admin@czrtoken.com

USER SUPPORT: support@czrtoken.com

GOVERNING JURISDICTION: British Virgin Islands

RELATIONSHIP WITH CZR EXCHANGE

CZR Fndn Ltd. and CZR Exchange are separate but affiliated legal entities within the broader CZR ecosystem.

CZR Fndn Ltd. is responsible for the issuance and administration of CZR. CZR Exchange operates the initial and primary trading venue and provides the principal trading and utility environment for the token.

THE ENTITIES MAY COLLABORATE ON:

- Token integration
- Trading functionality
- Liquidity arrangements
- CZR Wallet connectivity
- CZR Earn and rewards
- Membership benefits
- Community programs
- Launchpad participation
- Payment and Card products
- Marketing and education
- Additional ecosystem services

Services and commercial arrangements between ecosystem entities should be documented and reviewed under applicable authorization and conflict-of-interest procedures.

THE CZR ECOSYSTEM

CZR EXCHANGE

CZR Exchange is the central platform and intended primary trading venue for CZR.

DEPENDING ON JURISDICTION AND USER ELIGIBILITY, PRODUCTS MAY INCLUDE:

- Spot trading
- Futures trading
- Quick Swap
- Automated trading strategies
- Copy trading
- Savings and Earn products
- Referral and affiliate programs
- Reward programs
- Launchpad access
- Brokerage services
- Institutional liquidity services
- Market-making programs

CZR may be integrated through trading-fee benefits, CZR Earn, rewards, access requirements, memberships, referrals, loyalty programs, and partner benefits.

CZR WALLET

CZR Wallet extends the ecosystem into self-custody.

Users may use compatible wallets to receive, store, transfer, and interact with CZR and other supported digital assets.

POTENTIAL INTEGRATIONS INCLUDE:

- CZR storage and transfers
- Wallet-based rewards
- CZR Earn access
- Ecosystem campaigns
- Decentralized application access
- Swap and bridge functionality
- Payment integrations
- Token-gated benefits
- Partner applications

Partner applications

Users remain responsible for protecting their private keys, seed phrases, devices, wallet permissions, and recovery information.

PAYMENTS AND CZR CARD

The ecosystem roadmap includes payment services and utility connected to the existing CZR Card.

POTENTIAL FEATURES MAY INCLUDE:

- CZR-denominated rewards
- Eligible CZR Card cashback
- Reward and rebate payments in CZR
- Merchant discounts
- Partner offers
- VIP benefits
- Token-based membership tiers
- Global payment features

Payment and Card services may be delivered through regulated third-party partners and will remain subject to separate terms, eligibility requirements, fees, provider support, and geographic restrictions.

CZR TOKEN UTILITY

CZR is designed to provide increasing utility as the ecosystem develops.

Specific benefits may be introduced in phases and may be modified based on product economics, participation levels, legal requirements, security considerations, and user demand.

TRADING-FEE BENEFITS

Eligible holders may receive tiered trading-fee discounts or rebates on supported CZR Exchange products.

Qualification factors may include:

- CZR balances
- CZR committed through eligible programs
- Trading volume
- Account level
- VIP membership
- Promotional eligibility

CZR EARN AND ECOSYSTEM REWARDS

Eligible users may commit CZR to supported CZR Earn or ecosystem reward programs.

Potential rewards may be funded through:

- Disclosed token allocations
- Approved ecosystem budgets
- Eligible platform revenues
- Loyalty programs
- Promotional campaigns
- Transparently acquired CZR

No reward rate, annual percentage yield, or return is guaranteed by this Whitepaper.

VIP AND MEMBERSHIP ACCESS

Holding or committing CZR may unlock ecosystem membership levels and benefits, including:

- Trading-fee benefits
- Priority support
- Exclusive events
- Partner benefits
- Referral rewards
- Early product access
- Research and education
- Launchpad access
- Digital membership credentials

LAUNCHPAD ACCESS

Eligible CZR holders may receive access to selected token launches through the CZR Launchpad.

Every Launchpad project will remain subject to separate terms, due diligence, availability, and regulatory requirements.

COMMUNITY PARTICIPATION

CZR may support structured community signaling or non-binding voting for selected ecosystem matters.

Regulated, fiduciary, legal, security, compliance, and emergency decisions will remain with the responsible CZR entities and authorized management.

TREASURY AND TOKEN-SUPPLY PROGRAMS

Subject to formal approval, available resources, and applicable law, eligible ecosystem revenues may be used to:

- Fund ecosystem rewards
- Support approved liquidity programs
- Acquire CZR through supported markets
- Conduct approved token-supply initiatives

Any program will be announced separately through official CZR channels.

ecause an authorized minter may restore burned supply up to the cap, a burn must not be described as permanently irreversible while minting authority remains active.

No treasury or token-supply initiative guarantees demand, liquidity, price performance, or future token value.

TOKEN ECONOMY

The CZR token economy is designed around recurring product use rather than one-time distribution.

The intended economic cycle includes:

- Users acquire CZR through CZR Exchange or eligible ecosystem programs.
- Users hold or commit CZR to access eligible benefits.
- Activity across CZR Exchange, CZR Wallet, and CZR Card increases ecosystem engagement.
- Approved resources may fund rewards and loyalty programs.
- Approved programs may acquire CZR for rewards or other disclosed token-supply initiatives.
- Token utility encourages continued ecosystem participation.

Reward rates should be based on available budgets, eligible activity, participation levels, program duration, market conditions, and applicable law.

The ecosystem is not intended to depend on unconditional fixed yields.

Every token distributed through an ecosystem program must come from existing allocated supply or from CZR transparently acquired through supported markets.

No program may issue supply above the immutable one-billion-token cap.

FINAL TOKENOMICS

Maximum Supply

1,000,000,000 CZR

The final allocations total exactly 100% of maximum supply.

Final Allocation Summary

Allocation	CZR	Supply
Founder, Financing and Strategic Allocations	455,000,000	45.5%
Corporate Reserves	454,000,000	45.4%
Current Team and Advisors	71,000,000	7.1%
CZR Exchange Liquidity Operations	10,000,000	1.0%
Public Airdrop	10,000,000	1.0%
Total Maximum Supply	1,000,000,000	100.0%

The internal ownership and distribution details for individual founder, financing, employee, and advisor allocations are maintained in CZR's applicable legal, accounting, grant, and distribution records.

CORPORATE RESERVE VAULTS

Reserve Category	CZR	Supply
Strategic Liquidity Reserve	140,000,000	14.0%
Staking and Rewards Reserve	125,000,000	12.5%
Marketing and Growth Reserve	95,000,000	9.5%
Treasury and Operations Reserve	80,000,000	8.0%
Future Team and Advisor Reserve	14,000,000	1.4%
Total Corporate Reserves	454,000,000	45.4%

Each reserve category is intended to remain segregated by purpose.

Internal reserve categories do not create additional supply and remain part of the 454,000,000 CZR Corporate Reserves allocation.

Allocation Integrity and Prevention of Double Counting

- All CZR distributed through a sale, airdrop, reward, incentive, partnership, market-making arrangement, employee or advisor grant, ecosystem program, or other distribution must originate from an existing disclosed allocation.
- No distribution program creates an additional allocation or increases maximum supply.
- Any subdivision, reassignment, or program reserve remains accounted for within its original allocation

ALLOCATION PURPOSE

Founder, Financing, and Strategic Allocations — 45.5%

A total of 455,000,000 CZR is designated for founder, financing, and strategic allocations.

These tokens are intended to support:

- Long-term ecosystem alignment
- Strategic initiatives
- Financing arrangements
- Institutional relationships
- Business development
- Ecosystem stability
- Strategic partnerships
- Product growth
- Responsible long-term stewardship

- These tokens should not be treated as circulating solely because they exist on-chain.
- These allocations may be separated across hardware wallets, multisignature vaults, institutional custody arrangements, or vesting contracts.
- Individual allocations are maintained in the applicable confidential legal, accounting, grant, and distribution records.
- Founder, Financing, and Strategic Allocations are subject to a 12-month cliff followed by monthly release eligibility over 120 months.

CORPORATE RESERVES — 45.4%

A total of 454,000,000 CZR is allocated to Corporate Reserves.

These reserves may support:

- Strategic liquidity
- Staking and rewards
- Product integrations
- Strategic partnerships
- Treasury requirements
- Community programs
- Marketing and growth
- Merchant incentives
- Wallet integrations
- Future employee and advisor programs
- Approved liquidity support
- User-protection initiatives
- Additional authorized ecosystem purposes

Reserve ownership does not mean that the tokens are immediately circulating.

Current Team and Advisors — 7.1%

A total of 71,000,000 CZR is allocated to current team members and advisors.

Individual names and allocations are maintained in confidential employment, advisor, grant, legal and accounting records.

All current team and advisor allocations are intended to follow:

- A 12-month cliff
- 36 months of linear vesting following the cliff
- Signed employment, advisor or token-grant agreements
- Separate vesting records for each recipient
- Verified recipient wallet addresses
- Company rights over forfeited and unvested tokens where legally permitted

Future Team and Advisor Reserve — 1.4%

A total of 14,000,000 CZR within Corporate Reserves is designated as the Future Team and Advisor Reserve.

This reserve is not currently allocated to any individual.

It will remain in a dedicated corporate vault until future grants are approved.

Any future grant should be supported by an applicable employment, advisor, or token-grant agreement and an approved vesting schedule.

CZR EXCHANGE LIQUIDITY OPERATIONS 1.0%

A total of 10,000,000 CZR is allocated to CZR Exchange Liquidity Operations.

Liquidity Wallet	CZR	Supply
Initial Exchange Liquidity Wallet	5,000,000	0.5%
Liquidity Staging Wallet	5,000,000	0.5%
Total Liquidity Operations	10,000,000	1.0%

- Only 5,000,000 CZR is intended to be transferred initially to the active exchange liquidity wallet.
- The remaining 5,000,000 CZR should remain secured until the internal liquidity system and applicable risk controls have been tested.
- This allocation does not represent a commitment to maintain a particular market price or eliminate volatility.

Public Airdrop — 1.0%

- A total of 10,000,000 CZR is reserved for public airdrop programs.
- The CZR Genesis Airdrop is intended to make up to 5,000,000 CZR available from September 21, 2026, at 00:00 UTC through September 30, 2026, at 23:59 UTC.
- Participation remains subject to the separate CZR Community Airdrop Terms, eligibility verification, and program rules.
- The remaining 5,000,000 CZR is reserved for future public programs and is not automatically released.
- CZR will maintain records of eligibility, recipient wallets, distribution amounts, dates, and transaction hashes.

VESTING AND TOKEN RELEASES

Final Release Schedule

Allocation	Total CZR	Supply	Launch Release	Cliff	Release Period	Frequency
Founder, Financing, and Strategic Allocations	455,000,000	%45.5	0 CZR	**12 months**	**120 months following the cliff**	Monthly
Corporate Reserves	454,000,000	%45.4	0 CZR	3 months	18 months	Monthly
Current Team and Advisors	71,000,000	%7.1	0 CZR	12 months	36 months following the cliff	Monthly
CZR Exchange Liquidity Operations	10,000,000	%1.0	Up to 5,000,000 CZR	None	Operational	As required
Public Airdrop	10,000,000	%1.0	0 CZR	Until announced or claimed	Campaign-based	Program-specific
Total Maximum Supply	**1,000,000,000**	**%100.0**	**Up to 5,000,000 CZR**	—	—	—

APPROXIMATE MONTHLY RELEASE ELIGIBILITY

Allocation	Approximate Monthly Amount
Founder, Financing and Strategic Allocations	3,791,667 CZR
Corporate Reserves after applicable cliff	25,222,222 CZR
Current Team and Advisors after applicable cliff	1,972,222 CZR

- Monthly figures are approximate and may require a final-period adjustment for rounding.
- A scheduled release establishes eligibility for use. It does not require CZR Fndn Ltd. to distribute, transfer, sell, or spend released tokens.
- Actual circulation depends on whether tokens are unrestricted, transferable, and reasonably available to the public.

Distribution Programs

Any sale, airdrop, reward, grant, or incentive must be funded from an existing disclosed allocation.

Separate terms may establish

- Eligibility
- Vesting
- Lockups
- Claim procedures
- Geographic restrictions
- Identity verification
- Participation limits
- Disqualification
- Expiration
- Unclaimed-token treatment

Individual agreements and program terms will control where they conflict with a general description in this Whitepaper.

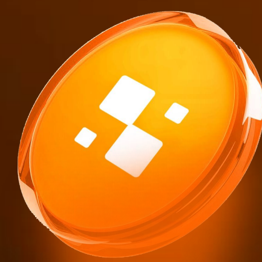
Circulating Supply

Maximum supply, total supply, allocated supply, released supply, and circulating supply are different measurements.

- **Maximum Supply:** The maximum number of CZR tokens permitted by the contract is 1,000,000,000.
- **Total Supply:** Total supply represents CZR currently minted, less tokens burned. While an authorized minter remains active, burned supply may be restored up to the maximum cap.
- **Allocated Supply:** Allocated supply identifies the intended ownership or purpose of maximum supply.
- **Released Supply:** Released supply consists of tokens that have become eligible for use under an applicable release schedule.

CIRCULATING SUPPLY

Circulating supply generally consists of tokens transferable and reasonably available to the public without material restrictions.



Circulating supply may exclude:

- Unvested tokens
- Locked distribution tokens
- Corporate reserves
- Restricted founder or strategic holdings
- Unclaimed airdrop tokens
- Operational reserves
- Undeployed liquidity inventory
- Tokens held in vesting contracts
- Restricted treasury balances

Expected Launch Circulating Supply

- Up to 5,000,000 CZR is expected to be deployed for market-making and liquidity operations at launch.
- This represents up to 0.5% of maximum supply.
- At the reference launch price of $0.025, the corresponding reference circulating market capitalization would be up to $125,000 before accounting for any airdrop tokens that have been distributed, claimed, become transferable, and are reasonably available to the market.
- If up to 5,000,000 Genesis Airdrop tokens are also distributed and become transferable at launch, total launch circulation could be higher.
- CZR will publish the applicable circulating-supply figure based on actual distribution, transfer restrictions, wallet balances, and public-market availability.
- This calculation does not represent guaranteed liquidity, volume, demand, market capitalization, or token value.

Circulating-Supply Outlook

Period	Scheduled Treatment	Circulation Principle
Launch	Up to 5,000,000 CZR may be deployed for liquidity operations	Only unrestricted tokens reasonably available to the market should be counted as circulating
Months 1—3	No Founder, Financing, and Strategic Allocations or Corporate Reserves are scheduled for release	Airdrop claims and operational transfers may affect actual circulation
Months 4—12	Corporate Reserves may become eligible for scheduled use; Founder, Financing, and Strategic Allocations remain subject to their cliff	Released tokens remain non-circulating while materially restricted or retained under treasury or program control
After Month 12	Founder, Financing, and Strategic Allocations and Current Team and Advisor allocations may begin monthly release eligibility	Only vested, unrestricted, transferable, and reasonably available tokens should be counted as circulating
Long Term	Founder, Financing, and Strategic Allocations follow the disclosed 120-month post-cliff release schedule	Actual circulation must be determined from restrictions, transfers, and on-chain activity

- This outlook is not a commitment to distribute or sell tokens.
- Current circulating supply should be determined using actual on-chain balances, contractual restrictions, custody arrangements, and public-market availability rather than allocation labels alone.

SMART-CONTRACT CONTROLS

Contract Information

CZR is deployed on Ethereum at:

0xfeD863B6A995BE69c2BBc5089BcDa5414793CE24

- These disclosures are based on verified source code, publicly observable on-chain configuration, and the final CertiK report published on September 17, 2026.
- Roles, balances, and pause status may change through authorized on-chain transactions. Users should independently verify current information through Ethereum and Etherscan.

Maximum Supply and Minting

- The contract has an immutable maximum supply cap of 1,000,000,000 CZR.
- The full maximum supply has been minted.
- Minting is restricted to addresses holding MINTER_ROLE.
- Because the full cap is minted, additional CZR cannot currently be minted.
- If tokens are burned while an authorized minter remains active, burned supply may be restored up to—but never above—the one-billion-token cap.

Contract Administration

- The contract uses OpenZeppelin role-based access control rather than a conventional owner.
- The disclosed initial administrative address is:
- 0xB1e733afb781aA2B8D3ae1A6651308e481a2807d
- The contract does not expose a conventional owner() function.

Role-Based Permissions

Default_admin_role

May grant or revoke administrative roles.

Minter_role

May mint CZR subject to the immutable maximum supply cap.

Pauser_role

May pause or unpause token transfers, minting and burning.

Upgradeability

The contract is not deployed as an upgradeable proxy. Its deployed code cannot be replaced through a proxy upgrade.

Wallet Freezing and Blacklisting

The contract does not contain wallet-specific freezing, blocking, or blacklisting functionality.

The pausing function applies to the contract generally rather than to a particular wallet.

Recovery and Clawback

Administrators cannot generally seize, recover, or transfer CZR directly from a holder's wallet.

The burnFrom function operates only where the holder has granted sufficient allowance.

Administrative Multisignature Status

The disclosed CertiK-reviewed Safe is:

0x0bdc784753A18B63965305BCd7007C4FBcCa772d

CertiK confirmed that this Safe was configured as a 2-of-3 multisignature wallet at the time of review.

CZR STATED THAT IT INTENDED TO:

Transfer DEFAULT_ADMIN_ROLE to a multisignature-controlled address	01
Transfer PAUSER_ROLE to a multisignature-controlled address	02
Permanently revoke MINTER_ROLE from all addresses	03

- CertiK stated that the relevant role-transfer and minter-revocation transactions were not provided before publication of the final report.
- Until these transactions are completed and independently verified on-chain, readers should not assume that the role changes have occurred.
- Treasury custody and token-contract administration must be evaluated as separate controls.

INDEPENDENT CERTIK AUDIT

Final CertiK Assessment

CertiK completed an independent security assessment of the CZR token contract.

Audit Detail	Information
Auditor	CertiK
Preliminary Comments	September 15, 2026
Final Report	September 17, 2026
Scope	Mainnet CZRToken.sol
Network	Ethereum
Methods	Manual Review, Static Analysis, and Testnet Deployment

Final Finding Summary

Finding Category	Final Result
Total Findings	3
Critical Findings	0
Major Findings	0
Medium Findings	0
Minor Findings	0

Finding Category	Final Result
Centralization Findings	2 acknowledged
Informational Findings	1 acknowledged
Resolved Findings	0
Partially Resolved Findings	0
Declined Findings	0

CZA-01 — INITIAL TOKEN DISTRIBUTION

- CertiK identified a centralization risk because the initial supply was delivered to the designated initial token recipient.
- CertiK recommended public allocation disclosure, strong private-key controls, multisignature custody, and vesting or lockup arrangements where appropriate.
- CZR explained that the initial recipient was used to facilitate the documented allocation process and was not intended to remain permanently controlled by a single externally owned account.

CZR identified the following Safe for undistributed foundation and ecosystem tokens:
0x0bdc784753A18B63965305BCd7007C4FBcCa772d

CertiK confirmed that the Safe was configured as a 2-of-3 multisignature wallet with the following signers at the time of review:
0xB1e733afb781aA2B8D3ae1A6651308e481a2807d
0x24EDaEb3482F53C25ea739abc2F1bE5Ef0B2926C
0xea81a232fEaCEB58D72d9e1Fe49315e2D8d94698

CertiK stated that the distribution plan and Whitepaper were not publicly available when the report was published. Publication of this Whitepaper is intended to address that disclosure point.

CZA-02 — Centralization Risks in CZRToken.sol

CertiK identified the authority held by:

DEFAULT_ADMIN_ROLE | MINTER_ROLE | PAUSER_ROLE

- CertiK classified these permissions as a centralization risk.
- CZR confirmed that the maximum supply is capped at 1,000,000,000 CZR and that the full maximum supply has been minted.
- CZR stated that it intended to transfer the administrator and pauser roles to multisignature-controlled addresses and permanently revoke the minter role from all addresses.
- CertiK stated that the relevant transaction hashes had not been provided before publication. The finding therefore remained acknowledged rather than resolved.

CZA-03 — Unlocked Compiler Version

- CertiK identified the unlocked Solidity compiler directive as an informational issue.
- CZR acknowledged that the contract was already deployed and verified on Ethereum and that changing the pragma would require redeployment without modifying the existing on-chain bytecode.
- The finding remained acknowledged.

FINAL AUDIT STATUS

- All three findings were marked Acknowledged.
- No critical, major, medium, or minor vulnerabilities were identified.
- The centralization findings describe privileged controls and distribution arrangements rather than a confirmed exploit. They remain material and should be evaluated through current on-chain role assignments, wallet configurations, and transaction records.

Publication Restriction

- The final report states that it may not be transmitted, disclosed, referred to, or relied upon by another person without CertiK's prior written consent.
- The full report should therefore be published or linked only after the required authorization is confirmed.

Audit Limitations

- A security audit does not guarantee that a contract is free from every defect, vulnerability, operational failure, economic risk, or future attack method.
- The CertiK assessment does not constitute an endorsement of CZR, its economics, legal status, commercial viability, or value.

TREASURY, CUSTODY, AND SECURITY

CertiK-Reviewed Safe

0x0bdc784753A18B63965305BCd7007C4FBcCa772d

CertiK confirmed that this Safe was configured as a 2-of-3 multisignature wallet at the time of review.

Corporate Reserve Vault Framework

- Separately named Corporate Reserve vaults may operate under a four-signer internal custody framework where implemented.
- The CertiK-reviewed 2-of-3 Safe is the specific wallet configuration independently confirmed in the final audit.
- The existence of a separate four-signer framework must not be interpreted as changing the configuration of the CertiK-reviewed Safe.
- The current owners, threshold, and address of each wallet control should be verified directly on-chain.

Each Corporate Reserve vault should have

- Its own Ethereum address
- A clearly defined purpose
- Multisignature approval requirements
- Whitelisted destination addresses
- Restricted user access
- Complete transaction records
- Regular balance reconciliation

TREASURY, CUSTODY, AND SECURITY

Corporate Reserves should remain separate from team allocations, the public airdrop, active exchange liquidity, and other allocations.

Function	Control Structure
CertiK-Reviewed Treasury Safe	Verified 2-of-3 multisignature Safe
Corporate Reserve Vaults	Four-signer internal custody framework where implemented
Contract Administration	Role-based access; current holders must be verified on-chain
Minting Authorization	Addresses holding MINTER_ROLE
Pausing Authorization	Addresses holding PAUSER_ROLE
Role Management	Addresses holding DEFAULT_ADMIN_ROLE
Wallet Blacklisting	Not supported

No security framework can eliminate every custody, technical, operational, or human risk.

ON-CHAIN TRANSPARENCY

CZR intends to provide public transparency regarding material token allocations, releases, and ecosystem-controlled wallets through:

https://czrtoken.com

Official Addresses

Token Contract

0xfeD863B6A995BE69c2BBc5089BcDa5414793CE24

CertiK-Reviewed Safe

0x0bdc784753A18B63965305BCd7007C4FBcCa772d

Disclosed Initial Administrator

0xB1e733afb781aA2B8D3ae1A6651308e481a2807d

Where appropriate, CZR may identify wallets or contracts associated with:

- Corporate treasury
- Contract administration
- Founder, Financing, and Strategic Allocations
- Corporate Reserves
- Liquidity Operations
- Market-making allocations
- Team and Advisor vesting
- Distribution programs
- Public Airdrops
- Token burns
- Ecosystem rewards

The transparency dashboard is intended to distinguish:

- Maximum supply
- Total supply
- Circulating supply
- Locked supply
- Reserved supply
- Released supply
- Treasury-held supply
- Operational liquidity
- Vested supply
- Gross burns
- Replacement minting
- Net supply reduction
- Material role changes

MARKET LAUNCH AND LIQUIDITY

Planned Launch Date: October 1, 2026

Reference Launch Price: $0.025

Reference FDV: $25,000,000

Initial Trading Venue: CZR Exchange

Initial Trading Pair: CZR/USDT

- CZR Exchange will serve as the initial and primary trading venue for CZR.
- Future availability through additional venues, decentralized exchanges, wallets, or partners will be announced separately.

No exchange, market maker, liquidity provider, or CZR-related entity can guarantee:

No exchange, market maker, liquidity provider, or CZR-related entity can guarantee:

- Market depth
- Trading spreads
- Token availability
- Execution price
- Continuous liquidity
- Future token value

Prohibited market activity includes:

- Wash trading
- Spoofing
- Deceptive orders
- Artificial volume
- Misleading market activity
- Unauthorized price coordination

TOKEN-HOLDER RIGHTS AND LIMITATIONS

Holding CZR does not provide:

- Equity in CZR Fndn Ltd.
- Equity in CZR Exchange
- Ownership of a CZR-related entity
- Partnership or joint-venture rights
- Creditor rights
- Dividend rights
- Revenue-sharing rights
- Profit-sharing rights
- Rights to company or treasury assets
- Guaranteed voting rights
- Guaranteed redemption
- Guaranteed liquidity
- Guaranteed rewards
- Guaranteed returns
- Management rights
- Rights to appoint or remove directors

CZR holders are not shareholders, members, partners, creditors, beneficiaries, or owners of a CZR entity solely because they hold CZR.

Any voting, rewards, memberships, discounts, or CZR Earn benefits will be governed by separate terms and may be changed, restricted, suspended, or discontinued.

CONFLICTS OF INTEREST

- CZR Fndn Ltd. and CZR Exchange are separate but affiliated legal entities.
- They may share a founder, beneficial owners, directors, officers, employees, consultants, or management personnel. This may create actual, potential, or perceived conflicts.

Persons involved in token administration may participate in decisions involving:

- Listings
- Listings Token utility
- CZR Earn
- Rewards
- Token-supply programs
- Liquidity
- Treasury activity
- Community programs
- Partnerships
- Market makers

- Such decisions should remain subject to documented authorization, treasury controls, conflict procedures, applicable law, and material disclosure requirements.
- Team members, advisors, directors, officers, contractors, and market makers may trade CZR only in accordance with applicable vesting restrictions, lockups, contractual limitations, pre-clearance requirements, blackout periods, and market-integrity rules.
- No restricted person may trade while possessing material nonpublic information.

RESTRICTED JURISDICTIONS

CZR is not offered, sold, distributed, marketed, or otherwise made available by CZR Fndn Ltd. in:

01 The United States

02 The United Kingdom

03 Member states of the European Union

The authorized token offering and related distribution programs are not available to restricted persons or persons acting for their account or benefit.

- Providing false location or residency information
- Using a VPN or proxy to evade eligibility controls
- Acting through another person or entity
- Using a nominee, trust, company, or wallet for a restricted person
- Misrepresenting beneficial ownership
- Violating sanctions or eligibility requirements

The appearance of CZR on an independent blockchain application or unauthorized third-party platform does not mean CZR Fndn Ltd. has targeted, approved, or distributed CZR in a restricted jurisdiction

No person may circumvent restrictions by:

REGULATORY STATUS

CZR is intended as a utility token.

Its legal classification may differ by jurisdiction and may change over time.

Nothing in this Whitepaper represents that CZR, CZR Fndn Ltd., CZR Exchange, or any ecosystem product has been approved, endorsed, guaranteed, or sponsored by a governmental or regulatory authority unless expressly stated and supported by an official authorization.

Products may be delayed, restricted, modified, or discontinued to comply with applicable laws, licensing requirements, sanctions, regulatory guidance, or enforcement developments.

$CZR ROADMAP

The $CZR roadmap is intended to expand token utility across CZR Exchange, CZR Wallet, the existing CZR Card, decentralized markets, centralized exchanges, community rewards, and future ecosystem integrations.

September 2026 — Pre-Launch

- Complete security, tokenomics, treasury, and vesting preparations
- Publish the verified Ethereum contract and supporting documentation
- Complete CoinMarketCap and CoinGecko pre-launch profiles
- Launch the CZR Genesis Airdrop and complete eligibility controls
- Prepare CZR/USDT liquidity and market-making infrastructure

October 2026 — $CZR Launch

- Launch $CZR on October 1, 2026, initially and exclusively on CZR Exchange
- Open CZR/USDT spot trading
- Enable eligible deposits and withdrawals
- Distribute qualifying Genesis Airdrop rewards
- Publish verified trading links, token statistics, and transparency information
- Begin continuous liquidity and market-integrity monitoring

November 2026 — Trading and Community Growth

- Introduce a limited zero-fee CZR/USDT trading campaign
- Launch eligible trading, referral, and community participation campaigns
- Expand creator, affiliate, ambassador, and educational programs
- Continue improving liquidity, spreads, and order-book depth

December 2026 — CZR Earn

- Introduce eligible flexible and fixed-term CZR Earn products
- Launch limited-cap promotional reward programs
- Introduce deposit-and-hold and year-end community campaigns
- Publish an initial ecosystem and treasury update

Final reward rates, funding sources, limits, eligibility requirements, supported regions, and availability will be announced before each product or campaign launches. No rate, yield, or return is guaranteed by this roadmap.

$CZR ROADMAP

Q1 2027 — VIP, Rewards, and Market Expansion

- Integrate $CZR into selected VIP benefits and fee programs
- Add $CZR missions, loyalty levels, and rewards to the CZR Exchange Rewards Hub
- Prepare the first official $CZR decentralized exchange liquidity pool
- Begin formal applications with selected centralized exchanges
- Expand circulating-supply, treasury, vesting, and reward reporting

The first official DEX pool is targeted for late Q1 2027 and remains subject to sufficient liquidity, healthy spreads, stable trading conditions, security review, and technical readiness.

Verified contract and liquidity-pool addresses will be published through official CZR channels.

Q2 2027 — CEX Expansion, CZR Card Rewards, and Payments

- Target the first approved external centralized exchange listings for $CZR
- Establish appropriate liquidity and monitoring for each approved market
- Add $CZR to the existing CZR Card reward and rebate system
- Enable eligible users to receive CZR Card rewards or cashback in $CZR
- Connect qualifying CZR Card rewards with CZR VIP and loyalty programs
- Expand CZR Wallet and eligible platform-fee utility

No external exchange will be identified until the relevant listing is approved and the exchange authorizes an announcement.

Final CZR Card reward rates, eligible transactions, limits, supported regions, and program terms will be announced separately.

Q3 2027 — Listings, Partnerships, and Integrations

- Pursue additional approved CEX and DEX market access
- Expand market-data and portfolio-tracking integrations
- Explore additional $CZR trading pairs
- Develop selected merchant, service-provider, and ecosystem partnerships
- Expand public market-data, API, and approved developer resources

Q4 2027 — Advanced Loyalty and Token Economy

- Introduce advanced $CZR loyalty tiers and qualifying ecosystem benefits
- Connect eligible CZR Exchange, CZR Wallet, CZR Card, and partner rewards
- Continue public treasury, vesting, and supply reporting
- Review ecosystem allocations, liquidity requirements, and incentive effectiveness
- Publish the 2027 CZR Ecosystem Report and an updated 2028 roadmap

$CZR ROADMAP

028 and Beyond — Long-Term Vision

Potential areas of development include:

- Expanded trading-fee utility
- Advanced CZR membership levels
- Broader CZR Wallet integration
- Additional CZR Card rewards and rebates
- Merchant and payment integrations
- Additional Earn and loyalty products
- Global ecosystem partnerships
- Developer tools and ecosystem grants
- Community participation programs
- Additional CEX and DEX market access
- Responsible treasury and token-supply initiatives

Roadmap Disclaimer

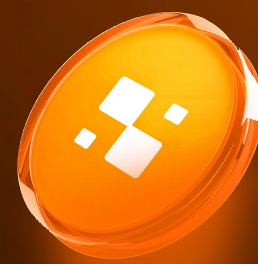
This roadmap contains forward-looking objectives and does not guarantee that any initiative will launch within a stated period.

- Timelines, features, integrations, rewards, listings, and availability may change.
- All roadmap objectives remain subject to technical readiness, security review, applicable law, licensing, liquidity requirements, commercial agreements, provider support, exchange approval, and market conditions.
- Availability may vary by jurisdiction.

RISK FACTORS

Material risks include:

- Token-price volatility
- Limited liquidity
- Smart-contract vulnerabilities
- Administrative-key compromise
- Privileged-role misuse
- Custody failures
- Wallet compromise
- Exchange failures
- Market manipulation
- Counterparty default
- Regulatory changes
- Tax uncertainty
- Technology disruption
- Ethereum congestion or failure
- Third-party integration risk
- Loss of private keys
- Phishing and social engineering
- Product delays
- Reduced token utility
- Failure to achieve adoption
- Total loss of value



Users should review the separate CZR Token Risk Disclosure before participating.

TAX DISCLAIMER

01 — Tax treatment depends on jurisdiction and individual circumstances.

02 — Acquiring, holding, committing, earning, transferring, selling, exchanging, burning, or otherwise using CZR may create tax consequences.

03 — Neither CZR Fndn Ltd. nor CZR Exchange provides tax advice through this Whitepaper.

04 — Users should consult qualified tax advisors.

GOVERNING LAW AND JURISDICTION

This Whitepaper and non-contractual matters related to it are governed by the laws of the British Virgin Islands, subject to mandatory applicable law and any separate binding terms governing a particular product, distribution, or transaction.

CZR Fndn Ltd. may seek urgent protective or injunctive relief in another court of competent jurisdiction where reasonably necessary.

SUPPORT, COMPLAINTS, AND SECURITY REPORTING

Administrative and Legal Matters

admin@czrtoken.com

User Support and Complaints

support@czrtoken.com

Security Reports

Use the subject line:

SECURITY REPORT — CZR TOKEN

A report should include:

- A description of the issue
- The affected system or contract
- Reproduction steps
- Potential impact
- Relevant transaction hashes
- Relevant wallet addresses
- Supporting evidence
- Contact information

Never send private keys, seed phrases, passwords, or authentication codes.

Submitting a complaint or security report does not guarantee compensation, recovery, a reward, or a particular outcome.

WHITEPAPER AMENDMENTS AND VERSION CONTROL

CZR Fndn Ltd. may update this Whitepaper when a material development, mistake, regulatory change, security event, or product change affects its contents.

A report should include:

- Version number
- Publication date
- Effective date
- Summary of material changes
- Sections affected
- Responsible issuing entity

WHITEPAPER AMENDMENTS AND VERSION CONTROL

The latest official version will be published through:

https://czrtoken.com

- No amendment can increase maximum supply above the immutable one-billion-token cap.

Revision History

Version	Date	Material Changes
1.0	September 25, 2026	Initial official public version of the CZR Token Whitepaper

If a translation conflicts with the English version, the English version will control, subject to mandatory applicable law.

FINAL STATEMENT

CZR is designed to connect a global digital-asset ecosystem through practical utility, disciplined supply controls, transparent allocation, long-term release schedules, and security-conscious operations.

CZR is intended to support participation across:

- Trading
- Self-custody
- Wallet services
- Payments
- CZR Card rewards and rebates
- Ecosystem rewards
- Memberships
- Launchpad access
- Partner integrations
- Community programs
- Future ecosystem participation

FINAL STATEMENT

CZR Exchange will serve as the initial and primary trading venue for CZR, connecting token activity with CZR Wallet, CZR Card, and the wider CZR ecosystem.
